DETAILED ACTION

Election/Restrictions

1. Applicant's response filed 2/28/2006 has been received. Upon further consideration of the claims, examiner notes that the previous restriction requirement is defective. Accordingly, a new restriction requirement is provided below:
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, classified in class 710, subclass 71, directed to serial-to-parallel or parallel-to-serial data modification in peripheral adapting.
 - II. Claims 8-11, classified in class 710, subclass 305, directed to bus interface architecture.
 - III. Claims 12-30, classified in class 710, subclass 11, directed to protocol selection in peripheral configuration.
3. Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination I has separate utility such as converting and transferring data between serial and parallel format. Subcombination II has separate utility such as intra-system connection. Subcombination III has separate utility such as selecting and supporting multiple protocols. See MPEP § 806.05(d).

4. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Response to Amendment

5. Applicant's amendments in response to the 35 U.S.C. 112 rejections have been noted and entered. Previous rejections are withdrawn.

6. Applicant's Terminal Disclaimer filed 3/24/2006 has been noted and entered. Previous double patenting rejections are withdrawn.

7. Examiner notes that previous 35 U.S.C 103 rejections have been withdrawn. Upon applicant's election of one of the above groups, a new non-final office action will be provided accordingly.
